## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ewing (5236749).

Ewing discloses a blister pack comprising an embossed blister formed from a laminated film (col. 1 lines 59-68, col. 2 lines 1-4).

Process limitations are given little or no patentable weight. The method of forming the product is not germane to the issue of patentability of the product itself. Further, when the prior art discloses a product which reasonably appears to be either identical with or only slightly different than a product claim in a product-by-process claim, the burden is on the Applicant to present evidence from which the Examiner could reasonably conclude that the claimed product differs in kind from those of the prior art. *In re Brown*, 459 F.2d 531, 173 USPQ 685 (CCPA 1972); *In re Fessman*, 489 F.2d 742, 180 USPQ 324 (CCPA 1974). This burden is NOT discharged solely because the product was derived from a process not known to the prior art. *In re Fessman*, 489 F.2d 742, 180 USPQ 324 (CCPA 1974).

Furthermore, the determination of patentability for a product-by-process claim is based on the product itself and not on the method of production. If the product in the

product-by-process claim is the same or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 227 USPQ 946, 966 (Fed. Cir. 1985) and MPEP §2113. In this case, the limitation of forming a blister by advancing a pin having a face with an indicia thereon in transversal direction relative to the film plane towards and into engagement with a platen bearing an indicia forming die thereon and located on the opposite side of the film wherein the advancing movement of the pin controllably stretches the film around the blister in a manner minimizing stretching of the film located at the base of the blister is a method of production and therefore does not determine the patentability of the product itself.

### ***Response to Arguments***

2. Applicant's arguments filed 4/28/03 have been fully considered but they are not persuasive.

In response to applicant's argument that Ewing does not teach or suggest an embossed blister however teaches a printed blister, emboss can be defined as to mold or carve in relief: *emboss a design on a coin*.<sup>1</sup> and printed can be defined as to press (a mark or design, for example) onto or into a surface.<sup>2</sup> Hence, embossing can be interpreted as printing.

In response to applicant's argument that claimed product differs in kind from the prior art, the process of making the prior art product is different from the claimed product however the prior art product itself is identical to the claimed product. Ewing discloses a blister pack comprising an embossed blister formed from a laminated film (col. 1 lines 59-68, col. 2 lines 1-4). The burden is on the Applicant to present evidence from which the Examiner could reasonably conclude that the claimed product differs in kind from those of the prior art and this burden is NOT discharged solely because the product was derived from a process not known to the prior art.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
